TOTAL CO₂ SAVED

4,405.89 kg

(01.01.2023 - 25.02.2024) ¹

Congratulations!

By using used hardware, you and your company are making a valuable contribution to reducing the ecological footprint and protecting our natural resources. At circulee we are proud to have you as a partner and what you have already saved and look forward to making a positive impact on the environment together.

DEVICES ²	# OF DEVICES	POTENTIAL CO ₂ ³	CO ₂ SAVED ⁴
Laptops	20	7,120 kg	2,440 kg
Tablets	12	1,692 kg	285.3 kg
Smartphone	9	549 kg	89.03 kg
PC System	3	1,107 kg	48 kg
Monitors	9	3,744 kg	43.56 kg
Total		14,212 kg	4,405.89 kg

¹ The CO₂ savings are calculated starting from the date you purchased your first device from circulee.

² Devices bought from circulee by the company.

³ Potential CO₂ value shows how many kg of CO₂ will be saved if each type of device is kept in use for a minimum of 4 years (summation of number of devices x potential CO₂ per device). Potential CO₂ kg savings per device type: Laptop = 356 kg, Tablet = 141 kg, Smartphone = 61 kg, PC-System = 369 kg, Monitor = 416 kg.

⁴ circulee calculation, based on independent market research commissioned by CHG-MERIDIAN AG, 2021. Maximum savings potential is achieved if the extension of usage corresponds to the assumed total usage period (monitor 51 months, laptop 51 months, smartphone 36 months).
